**Portfolio:** pub.hugoborges.dev.br/p/portfolio

## Summary

Unity engineer with six years in production, building games and the infrastructure that ships them: a framework that ported 70+ Flash games to Unity, a platform that runs many games for days on cabinets and tablets, editor tooling and CI. Now Tech Director, still hands-on. I also ship my own games and tools.

## Experience

Jun 2026 – present

**Tech Director** · TGS Gaming, Brazil

- Lead the technical direction of multiple game projects; primary technical partner for game directors on scope and architecture.
- Define engineering standards and oversee architecture decisions across projects and teams.
- Coordinate engineering, technical art, QA, production and infrastructure; anticipate technical risks and report project health.
- Lead and mentor game developers through technical coaching and career development.

Mar 2024 – Jun 2026

**Senior Unity & Tools Developer** · TGS Gaming, Brazil

- Built infrastructure integrating multiple Unity games with remote servers through WebSocket and REST.
- Maintained Addressables bundles and repository structure across projects.
- Wrote editor tools and pipeline scripts for developers, QA and technical artists; TeamCity CI and build automation.
- Led onboarding and mentorship for junior developers.

Apr 2020 – Feb 2024

**Unity Developer, junior to senior** · Hydra Games, Brazil

- Built the framework that ported 70+ Adobe AIR games to Unity: animation runtime (timelines, bones, sprite sheets), events, particles, shaders, POS connectivity, automated builds.
- Senior: infrastructure for a Unity platform that loads many games over days on cabinets and tablets, with server-side session sync and local and remote bundles.
- Gathered requirements with clients and managers; wrote documentation and test routines.

2018 – 2020

**Software Developer & Analyst** · KMEE, Itajubá, Brazil

- Python and Odoo ERP integrations, online banking and unit testing; mentored other developers.

2018 – 2020

**Game Programming Director, Dev-U** · UNIFEI, Itajubá, Brazil

- Ran the university game-dev group: projects, repositories, game jams and tutoring.

Earlier: Software Development Intern, UNIFEI (2016 – 2017); Graphic Design Teacher, ITEP (2012).

## Selected projects

**Emburradinho.** My own mobile game, live on Google Play. Unity 2022.3, physics jumping and wall jumping, Google Play services leaderboards, Firebase.

**Quick Pen & Quick Focus.** Windows tools in C# and WPF, released as Quick Labs: free downloads with lifetime Pro licenses on Gumroad.

**CS50G space shooter.** Reusable Unity toolkit: state machine with a custom editor, object pooling, tag logging, versioned build system with changelog.

**Game jams.** Global Game Jam 2021 (Crowlie), Coding, Pizza & Glory 2019 (The Chosen Two), Dev-U and Code 'n Play.

## Education

**BSc Computer Engineering** 2013 – 2018
Federal University of Itajubá (UNIFEI)

**IT Technical Certification** 2010 – 2011
ETEC Centro Paula Souza

## Languages

Portuguese (native) · English (C1)

## Courses

**CS50G Introduction to Game Development** 2023
HarvardX

**A Complete Guide to Game Design** 2024
HP / edX

**Artificial Intelligence for Unity · Shader Graph** 2024
Holistic3D

**Cutscenes in Unity with Timeline** 2024
Udemy

## Skills

| | |
|---|---|
| **Gameplay** | Unity, C#, HLSL and Shader Graph, Spine, Timeline, WebGL, Android |
| **Infrastructure** | Addressables, WebSocket, REST APIs, TeamCity, Jenkins, Git, profiling |
| **Tools & languages** | Unity editor tooling, Python, PowerShell, C++, Lua, C# / WPF |
